COS 301 | Team Code X

Revised To Do List

- Zizo Report | **Heinrich**
- Firebird + Reddis Report | **Jocelyn**
- Documentation:
  - ✓ References – Not really needed now, so in that case, it's "done"
  - ✓ (2.1.4) Software Interface | **Heinrich**
  - ✓ *(2.1.8) Sit Adaption Requirements – we need to research what this is*
  - ✓ Constraints | **Tim**
  - ✓ *Assumptions and Dependencies - we need to research what this is*
  - ✓ (3.1.1) Software Interfaces – this is done, but could Jocelyn please just check it for me if it's correct. (Thanks) | **Jocelyn**
  - ✓ Use Cases – Meeting on Slack regarding this, before any other decisions are made | **ALL**
  - ✓ Important | **Eunice**
  - ✓ Nice to have – Done, BUT, as I mentioned in the vn, do you think we should add "mobile app" to this Section? | **Jocelyn**
  - ✓ Design Constraints | **Tim**/Eunice
  - ✓ Quality Requirements – I believe these are in the textbook, so can have a look | **Tim**
  - ✓ Final review and proof-read | **Eunice**

All the above to be in and ready before the end of **TODAY – July 14, 2017 (i.e. 23.59 PM)**

All work to be uploaded to Github **update branch**.

- Merge Latex document right through to Master by **18.00 July 15, 2017** | **Daniel**
- **Delegate Use Cases if need be.**
- Everyone's contribution to the **"Service Report"** to be uploaded to Git by **20.30 July 15, 2017.**

Just a recap in case anyone missed it: This Report is feedback Emilio requested. Initially, I presumed I was to put it together. However, we are **ALL** to contribute to it.

Things for the report:
  - ✓ Individual DBMS reports. Once they are completed for the tex doc, it's done for this.
  - ✓ Progress in the team (I guess your perspective)
  - ✓ The work you've contributed to the document – just merely stating what you've done
  - ✓ Challenges you've faced with individual/various tasks

- ✓ Any other concerns

This will be compiled into one document, reviewed and emailed to Emilio soon after. (Eunice).
This should be in by the 18.00 on Saturday July 15, 2017.

- **JULY 16, 2017 –** Slack Meeting on the **"Way Forward"** regarding our project. This will include **moving forward towards the Demo (Implementation), booking for the demo, Client Meeting, planning to meet with Emilio (and probably Stacey as well) etc.**

Remember, all Documentation changes are to be made in the "System Requirements and Design.tex" under the **UPDATE** branch. **Everything else goes to the develop branch.**

That's all for now 😊

(and make sure to keep an eye on Slack convos)
